

TRAIL COUNT

2019

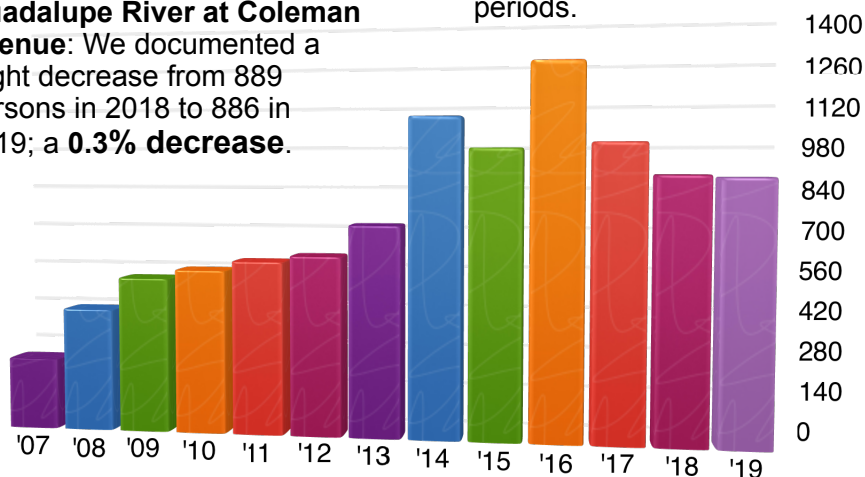

13th Annual Count of Trail Users in San José

San José's thirteenth annual count of trail users occurred on Wednesday, September 11 at six count stations for 12 hours and one station for 5 hours.

The related survey results are published via the Trail Count 2019 Summary Report.

We documented a slight decrease at our longest running count station (Coleman Avenue), with total use below 1,000 over the past three years. Elsewhere along the Guadalupe River, we saw a large drop in Downtown and a light increase in north San Jose. Trail usage at Coleman Avenue is charted below.

1. **Guadalupe River at Coleman Avenue:** We documented a slight decrease from 889 persons in 2018 to 886 in 2019; a **0.3% decrease**.
